Reasons for Allowance

1. Claims 1-8 and 10-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious all the limitations in independent claim 1. Specifically the combination of a semiconductor device comprising a semiconductor body which is provided with a field effect transistor at a surface and which comprises strongly doped source and drain zones and a channel region extending between the source zone and the drain zone, with a gate electrode being present which overlaps the channel region upon perpendicular projection thereon, wherein the source zone, the drain zone and the gate electrode are connected at the surface to a metal source contact, a drain contact and a gate electrode contact, respectively in the form of metal strips, and wherein a further metal strip is positioned between the gate electrode contact and the drain contact, which further metal strip is insulated from the semiconductor body, is locally electrically connected to the metal source contact, and forms a shield between the gate electrode and the drain contact, characterized in that the electrical connection between the further metal strip and the metal source contact comprises a capacitor, and in that the further metal strip is provided with a connecting contact for applying an external voltage to the further metal strip.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The following patents and published patent applications are cited to further show the status of the art with respect to field effect transistors containing shield plates and capacitors.

Costa et al. (US Patent 5,578,860)

Herbert et al. (US Patent 5,898,198)
